Issued June 2024

Projects

- [Breezy](#) - Collaborated in the development of a full-stack app using react.js and tailwind for the frontend, node.js/express.js for the backend, DockerFile for containerization and hosted on Google Cloud.
- [Portfolio Website](#) - Designed and developed a responsive, multi page portfolio website with React.js framework, includes animations and dynamic components.
- [Movie Watchlist](#) - Developed a web application using JavaScript that lets users search for movies fetched from OMDb API. Users are then able to add movies to a watchlist which is stored in local browser storage.

Work Experience

Gallant Marble Co Limited
Material Handler

Jul 2017 - Mar 2020 (2 years 9 months)

- Assisted in managing inventory using a variety of inventory management systems
- Catered to clientele questions and concerns regarding material, design, and handling
- Coordinated communication between customers and management on-site to ensure smooth workflow

Objective

I am currently looking for job opportunities that will utilize my problem-solving abilities, organizational skills, and technical knowledge. My goal is to enhance my existing skills while acquiring new knowledge to drive my growth and advance my career in the tech industry.
