Summary

Web Developer dedicated to delivering intuitive and efficient web applications. Proficient in Java, JavaScript, HTML, CSS, React.js.

Being a recent graduate from York University, with a Bachelor's degree in Computer Science I have a strong foundation in computer science. While completing my degree at York University, I learned the fundamentals of programming, object-oriented programming, data structures, algorithms, logic and software engineering, became skilled in a diverse range of programming languages and other computer science related topics.

After my education at York, I decided to take my first plunge into web development by completing A front-end development certificate from Scrimba. Through this program, I learned about developing web applications using HTML, CSS, JavaScript, and React.js, and applied this knowledge through several personal projects utilizing these technologies. Topics ranged from structuring web pages with HTML and styling them with CSS to implementing dynamic functionality and interactivity using JavaScript and React.js. I gained hands-on programming experience in all aspects of front-end development. Upon completing this certificate, I gained the web development skills needed to create fully functional and visually appealing web applications.

I am currently looking for web developer/ front-end developer opportunities, and am eager to join a work environment that will utilize my computer science and programming background, and continue learning and growing as a developer. My goal is to contribute to the development of web applications that are high quality, efficient and gain experience in the field.

Experience

Material Handler

Gallant Marble Co Limited

Jul 2017 - Mar 2020 (2 years 9 months)
